Dear Candidate,

We believe that delivering a task on time is an important key factor, but the approach, quality and the code style are much more important.

The Challenge

Menu Android Application

Description

Create a simple Android application that displays a menu (PSDs attached), which are shown in Landscape view **only**.

The designs are uploaded on Adobe XD, you will need to download Adobe XD to be able to see the designs. The files are attached in this email.

Requirements

- Android application for a menu.
- The app should start working on its own the minute the Tablet is unlocked
- The app should be compatible with **Tablets**
- The app should have two languages (Eng./Arab.)
- The app should have two levels of categories and the user should select one of them
- On the left side, the categories of the menu should appear (as shown in the images attached)
- Only, when **none** of the categories are clicked on, the logo should appear at the top of the left side bar
- When clicking on any of the items, its image will be zoomed on

Deliverables

The **Source code** and the **APK** should be uploaded to any cloud server (Dropbox, Google Drive,….,etc.) , if GitHub will be a plus!

API

URL: http://50.87.52.41/~develps7/AutoZ/web/app_dev.php/en/api/restaurant/get-categories

Request body: You need to send the details in the "request body" as a Jason format.
{"apiKey": "b07ae77b9f59af870c91662a23ac8813758b0786"}

Deadline

The deliverables should be delivered before Thursday 27/09/2018 4 pm.

Note: kindly submit the deliverables before the deadline even if it is not complete.
